

Book Record Management | Creating Forms

Create forms

- In BRMapp/Forms.py

```
from django import forms

class NewBookForm(forms.Form):
    title=forms.CharField(label='Title',max_length=100)
    price=forms.FloatField(label='Price')
    author=forms.CharField(label='Author')
    publisher=forms.CharField(label='publisher')

class SearchForm(forms.Form):
    title=forms.CharField(label='Title',max_length=100)
```
