

Book Record Management | Delete Book Record

Create Views

- In BRMapp/views.py, define function deleteBook

```
def deleteBook(request):  
    bookid=request.GET['bookid']  
    book=models.Book.objects.filter(id=bookid)  
    book.delete()  
    return HttpResponseRedirect('BRMapp/view-books')
```

- No Html file is required for delete operation
