

## Useful tags

### Anchor tag

- The internet is made up of lots of links. Almost everything you click on while surfing the web is a link takes you to another page within the website you are visiting or to an external site.
- Links are included in an attribute opened by the <a> tag.

```
<a href="https://premium.mysirg.com/learn">Your link text here</a>
```

- href is an essential attribute of anchor tag, its value is URL of the page which will open once the link text is clicked.

### Image Tag

- Images are very common thing using in web pages. <img> tag is used to embed an image in the web page.
- <img> is an empty tag.

```

```

- Src is an essential attribute whose value is url of image file.
- Supported image file types are jpg, png and gif
- Alt attribute is important to ensure that your site is ranked correctly on search sites and also for visually impaired visitors to your site.
- ```

```

### List Tag

- There are two different types of lists
  - Ordered List
  - Unordered List

### Ordered List

- It is a list of items where order (sequence) matters

```
<ol>  
    <li>Item 1</li>  
    <li>Item 2</li>  
    <li>Item 3</li>  
</ol>
```

- `<ol>` tag is used to create ordered list
- `<li>` tag is child tag of `<ol>` tag, which is used to define a list item.
- You can have any number of `<li>` tags in `<ol>` tag
- You can have list inside a list to create a sub-list

```
<ol>
  <li>
    <ol>
      <li>sublist Item 1</li>
      <li>sublist Item 2</li>
      <li>sublist Item 3</li>
    </ol>
  </li>
  <li>Item 2</li>
  <li>Item 3</li>
</ol>
```

•

## Unordered List

- It is a list of items where order (sequence) doesn't matter

```
<ul>
  <li>Item 1</li>
  <li>Item 2</li>
  <li>Item 3</li>
</ul>
```

•

- `<ul>` tag is used to create unordered list
- `<li>` tag is child tag of `<ul>` tag, which is used to define a list item.
- You can have any number of `<li>` tags in `<ul>` tag
- You can have list inside a list to create a sub-list

```
<ul>
  <li>
    <ul>
      <li>sublist Item 1</li>
      <li>sublist Item 2</li>
      <li>sublist Item 3</li>
    </ul>
  </li>
  <li>Item 2</li>
```

```
<li>Item 3</li>  
</ul>
```
